DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Brinegar House c. 1858-1877 is a 2nd story frame house on Oakwood road, just east of Pilot Town Crossroads. The house is on the southern side of the road. The main gable runs north/south while the main facade has a eastern exposure.

Like so many of these modest frame dwellings they were easy targets for renovation and change. ~~They undoubtedly did not offer much resistance to alterations.~~

This 2nd story house was 2 bays across by 2 bays deep and undoubtedly similar to some of its neighbors, until renovation. Two major additions were added to the south and east sides and aluminum siding to the exterior. Single pane sash windows were chosen over the early ones. The interior of this house has also been extensively redone.

Pilot Town

CE- 840, 842, 843, 844, 845 (log house), 846, 847 (school no. 3), 848, 849 (store), 850, 851, 852, 853 (Johnson Victorian), 854, 855, 856, 857, 858, 859, 860, 861, 862, 863.

Pilot Town owes its existence to two primary reasons. The first is the 19th Century mining activity in the area and the second is the shift of the Susquehanna crossing from the Bald Friar ferry to the town of Conowingo. The road from Pennsylvania to the Bald Friar ferry passed west of the present Pilot Town crossroads. It is obvious that this route predated any other southerly route in the vicinity especially since the earlier farms and houses are oriented to it. St. Patrick's Church (CE-834), Pembroke Farm (CE-836), Moore-Love log house (CE-845), and the Fulton-Alexander House (CE-841) all date from before the mid 19th Century and stand near or next to the earlier route. Due to the treacherous descent to the ferry and easier access at Conowingo a covered bridge was built across the Susquehanna at Conowingo, which eclipsed activity at Bald Friar. With the construction of a bridge at Conowingo a more direct southerly route from Pennsylvania was needed, which necessitated an easterly shift in travel. It amounted to a difference of a few hundred yards but was enough to form an intersection with the east/west Mount Pleasant road. Continued interest in the mining of feldspar, soapstone, and gravel in the mid 19th Century brought more development and change. Pilot Town was a definite result of these two factors and the mid to late 19th Century housing that exists today is ample evidence for this occurrence. Pilot Town supported a local market till the early 20th Century (CE-849) and its own school (CE-847) till about the same time.

The houses that make up Pilot Town are traditional two^{story} frame structures that one sees throughout Cecil County. (see CE-840, CE-842, CE-844, CE-846,

CE-848, CE-851, CE-852, CE-853, CE-854, CE-855, CE-856, CE-857, CE-858, CE-859, CE-860, CE-861, CE-862, CE-863) The structures are basically

plain straightforward buildings that are typical houses for workers in a mining area. This is not to say that the previous agricultural life of area was replaced by the mines. The farming community continued as it had since the late 18th Century but now alongside mining operations that brought Irish immigrants in the early 19th Century.
